The Global Environment of Business Frederick Guy, 2009 The globalization of business activity: whether you love it or hate it, it affects you. What causes it, how different countries deal with it, and what the future might hold for it are all key questions which The Global Environment of Business answers. It traces the growth of big business, thecomings andgoings of economic globalization over two centuries, and compares the institutional environments and track records of business in a selection of countries on every continent today. It examines the role of local and regional clusters of small and medium-sized companies, and the obstacles which both oil wealth, and concentrated land ownership, pose for poor countries trying to develop. The final chapter assesses the sustainability of global business in the context of climate change and growth of regional blocs. Changing forms of business organization; changing technology; who wins and who loses; all are kept in sight throughout the book. Frederick Guy pulls together all these various themes. Employing clear, vivid examples, narrative structures, and stories, it is not a dry textbook. Economic, political, and sociological theories are used, explained, evaluated; and employed to knit together a collection of vivid examples and cases.

Neoliberalism in the Tourism and Hospitality Sector Nadda, Vipin, Bilan, Sahidi, Azam, Muhammad, Mulindwa, Dirisa, 2018-10-26 Globalization is increasing interconnectedness and is offering immense opportunities for businesses worldwide. Although it has been taking place for hundreds of years, it has sped up enormously over the last half-century, increasing international trade, greater dependence on the global economy, and freer movement of capital, goods, and services. While globalization can create opportunities for wealth in emerging economies, it still cannot completely close the gap between the world’s poorest countries and the world’s richest. Many view globalization as a threat to cultural diversity, believing that it can drown out local economies, traditions, and languages and make travel to certain regions less desirable. Neoliberalism in the Tourism and Hospitality Sector provides innovative insights into the adoption of glocalization as a measure to mitigate the threats posed by globalization within the travel and tourism industries. It is designed for policymakers, researchers, government officials, and marketers considering glocalization as a means to sustain the relevancy of local business and trade.
